Nicolás Zanini

Full Stack Developer · Angular · .NET / C# · SQL Server · PostgreSQL

Rosario, Santa Fe, Argentina · nicolas_zanini@hotmail.com · +54 341 6876713 · linkedin.com/in/nicolaszanini · github.com/NicolasZanini21 · nicolaszanini21.github.io

PROFESSIONAL PROFILE

Full Stack Developer focused on Angular (frontend) and .NET / C# (backend). Since April 2025 I've worked at Patagonia Chain as the sole developer for my assigned systems: client requirements gathering, database modeling, API and frontend development, deployment, and ongoing support. These include the Auxilio Express management system and the Digno Bar digital menu, both in active production. I also built my own portfolio site where I showcase my projects with live, browsable demos rather than just screenshots (nicolaszanini21.github.io). Before moving into development I spent eight years in customer service, sales, logistics, and administration — experience that now helps me translate what a client actually needs into concrete technical requirements. I'm looking to join a development team in a full-time role.

TECHNOLOGIES

Backend: C#, .NET, ASP.NET Core, Entity Framework, REST API design and consumption
Frontend: Angular, TypeScript, JavaScript, HTML, CSS
Databases: SQL Server, PostgreSQL, relational modeling
Other: Python (Flask), Git, GitHub, Visual Studio, VS Code, AI tools (Claude) integrated into the development workflow

EXPERIENCE

Full Stack Developer — Patagonia Chain **April 2025 – Present**
Rosario, Argentina (remote/hybrid)

- Sole developer responsible for assigned systems: client requirements gathering, database modeling, API and frontend development, deployment, and ongoing maintenance.
- Designed and implemented REST APIs with ASP.NET Core; modeled databases in SQL Server and PostgreSQL using Entity Framework as the ORM.
- **Auxilio Express:** client, case-file, driver, and vehicle management system with cost calculation and Excel export. In production, with active maintenance.
- **Digno Bar:** interactive digital menu built end-to-end (Angular + .NET). In production, with ongoing enhancements.

PERSONAL PROJECTS

Full portfolio with live demos: nicolaszanini21.github.io

Edith — Personal Virtual Assistant · ***Personal project, v1 live***

Voice assistant in Rioplatense Spanish. Designed the full AI pipeline: ASP.NET Core (.NET 9) + Python/Flask, conversational memory in PostgreSQL, transcription with Whisper, speech synthesis with Piper/ElevenLabs, responses powered by Gemini, and browser automation with Playwright. Installable PWA for desktop and mobile, with Spotify and Netflix integrations in the personal version.
Live public demo (scaled-down version, no personal accounts): edith-web.onrender.com · Repo: github.com/NicolasZanini21/edith

Travel Agency CRM · ***Personal project, v1 live***

Sales management tool for a travel agency: destinations, packages, travelers, and bookings. Angular + .NET/C#, custom relational modeling in SQL Server/PostgreSQL with Entity Framework. Hosted with Postgres (Neon), API on Render, frontend on Netlify.
Live demo: crm-viajes-demo.netlify.app · Repo: github.com/NicolasZanini21/crm-viajes

EDUCATION

Intensive Full Stack Course — Instituto CCTI, Buenos Aires 2022 (6 months)
High school diploma — Tourism track, Escuela Normal N° 2 2016

LANGUAGES & ADDITIONAL

Native Spanish. English: technical reading proficiency. Driver's license B1.
